ATTRACTIVE FOR SMALL GIRLS.

5534

Dress for small girls, carried out in cotton sponge and made without a lining. The back and long sleeves are one piece, and the straight skirt has pleats at the sides, but gathers at the front and back.

Of attractive frocks for the small girl there is no end, and as the season progresses pretty new models appear day after day. The simplest are, perhaps, among the new spring and summer cottons. The clever model shown here is of dotted sponge trimmed with Scotch gingham in a pretty plaid. There is a long blouse with a shoulder

yoke of the same material, the sleeves being cut into one with the yoke. Belt, collar and cuffs are of the plaid, and the neck may be finished in either high or low effect.

To make the dress requires:
2 1/2 yards 36-inch material at 50c. yard \$0.85
1/2 yard plaid for trimming at 60c. yard \$0.30

Since the vest is an adjustable affair, this may be transferred from dress to dress.

When 36-inch material is used, it can be folded to splendid advantage in cutting out the dress. The skirt being a straight flounce, it can be arranged about 2 inches from the edge of the sponge, on the fold. The pleating follows next, being laid a little further toward the open edges. The back and sleeve (in one piece) is laid on a fold of the goods. The round collar, cuffs, pleating for back and sleeve and front are all arranged on a lengthwise thread of the material.

Now, to make the dress, first gather the upper and lower edges of front and lower edge of back between double "TT" perforations. Sew upper edge of front to back and sleeve section, notches and center-fronts even; large "O" perforations indicate center-front. Close under-arm and sleeve seams as notched. Adjust stay to position underneath gathers at lower edge of waist, centers even (large "O" perforation indicates center-front), small "o" perforation at under-arm seam. Close back seam of round collar (indicated by small "o" perforation), sew to neck edge as notched. Sew standing collar as notched, sew to lower edge of long sleeve as notched.

For the skirt, turn hem at lower edge on double "oo" perforations. Pleat, creasing on slit perforations, bring folded edge to line of small "o" perforations and press. Gather upper edge between double "TT" perforations. Lap right front over on left, centers even (double "oo" perforations indicate center-front); stitch in position, leaving free above large "O" perforations for opening. Sew to lower edge of waist, centers even, bringing line of single small "o" perforations to under-arm seam.

BE OPTIMISTIC SAYS A WRITER

Gloomy Persons Attract Gloomy Things and Success Comes to Optimist, He Says.

In the May Woman's Home Companion Ralph Waldo Trine, writing an article entitled "The Pleasures We Take Captive," says that the cheerful habit of mind is one of the most potent factors in materializing success. As is our kind of thought so is our kind of life. The following extra from the article elaborates the point:

"It would be hard to find a single paragraph anywhere that contains more luminous and indisputable truth than the following, by Prentice Mulford: 'People ruled by the mood of gloom attract to them gloomy things. The hopeful, confident and cheerful attract the elements of success.'"

Clothes Show Thought.
A man's front or back yard will advertise that man's ruling mood in the way it is kept. A woman at home shows her state of mind in her dress. A slattern advertises the ruling mood of hopelessness, carelessness, and lack of system. Rags, tatters and dirt are always in the mind before being on the body. The thought that is most put out brings its corresponding visible element to crystallize about you as surely and literally as the visible bit of copper in solution attracts to it the invisible copper in that solution. Every thought of yours has a literal value to you in every possible way in whatever mood you set your mind does your spirit receive of unseen substance in correspondence with that mood."

WATER

In the Amount of 600,000 Gallons Annually May Be Purchased by B. & O.

FAIRMONT, April 15.—If a satisfactory price can be arranged between the Baltimore and Ohio Railroad Company and the city of Fairmont the company will make an agreement to use approximately 600,000 gallons of city water daily. The city water commissioner is in receipt of a communication asking what rate would be made to them for the amount of water and saying that they would begin to use it about May 15 if arrangements can be perfected. If the contract is made, which is quite probable, about 350,000 gallons or one-half of the water will be used at the local round house while the other half will be used for the purpose of supplying the company's engines with water at the reservoir near the depot. At the present time the engines are watered at Clarksburg but the company claims that the water is not suitable for engines, as it contains "some" substance which eats holes in the boiler.

QUEZON SAYS PHILIPPINES SHOULD BE FREE

Philippine Commissioner, in a Speech, Advocates Freedom of His People.

(BY ASSOCIATED PRESS)
CLEVELAND, April 16.—Independence of the Philippines was strongly advocated by Manuel L. Quezon, one of the Philippine commissioners at Washington, in an address before the Cleveland Chamber of Industry here. "The duty of the United States to the Philippines, is plain," said Mr. Quezon. "Congress should enact a law giving the Filipinos their independence. The reasons are these:

This Country's Promise.
"This country has promised, both expressly and by implication, to withdraw its sovereignty from the Philippine islands. By implication, we mean upon the declaration of war between the United States and Spain the government of the United States asserted that that was not waged for territorial aggrandizement or commercial expansion; expressly, in that the past Republican and the present Democratic administration have both de-

CAN'T DENY IT

If This Had Happened Elsewhere Instead of Clarksburg You Might Doubt It.

The average man is a doubter. This is not surprising—the public have been humbugged so frequently they are skeptical. Proof like the following will stand investigation. It cannot be disputed.

Mrs. L. B. Dunnington, 119 First St., Clarksburg, W. Va., says: "The first I noticed of kidney trouble was when I began to suffer from dull dragging pains across the small of my back. They grew more severe every day, then I began to have dizzy and nervous spells. It hurt me to straighten after stooping. The kidney secretions annoyed me, too. When I heard about Doan's Kidney Pills, I used them and before long they brought me relief. The pain, dizziness and nervousness left me and my kidneys became normal."
